Adding, editing, hiding, deleting a Course

Adding : Open the Create Course page. Fill out the course details (code, course name, instructor's name, term, year, and description if needed). Click on **Create Course**.

The image shows a web form titled "Admin Dashboard - Create Course". The form is a white box with a light gray border. It contains several input fields and a checkbox. The fields are: "Course Code (required):" with the value "SOEN228"; "Course Name (required):" with the value "System Hardware"; "Instructor Name (required):" with the value "Dr. Mellah"; "Term/Season:" with a dropdown menu showing "Winter"; "Year:" with the value "2026"; and "Course Description (optional):" with a text area containing "This course covers: Boolean Algebra, Digital logic and the design of logic circuits; CPU design; addressing modes; instruction sets and sequencing". Below the text area is a checkbox labeled "Enable Course:" which is checked. At the bottom of the form are two buttons: "Create Course" and "Sample Course". The "Create Course" button is highlighted with a red circle.

Editing : Click on **Edit** below a course, in order to edit this course's details. Once you've updated the details, clicking on **Update Course** will update it.

The image shows two parts of a web interface. The top part is a form titled "Admin Dashboard - Edit Course" (though the title is not explicitly shown, it's the same as the one above). It contains the same fields as the "Create Course" form, but the "Course Code" field is disabled. The "Term/Season:" dropdown menu shows "Select season". The "Year:" field shows "2026". The "Course Description (optional):" text area shows "This course covers...". The "Enable Course:" checkbox is checked. Below the form are two buttons: "Create Course" and "Sample Course". The bottom part of the image shows a "Course List" section. It contains a card for the course "SOEN228 - System Hardware" by "Dr. Mellah | Winter 2026". The card displays the course description: "This course covers: Boolean Algebra, Digital logic and the design of logic circuits; CPU design; addressing modes; instruction sets and sequencing". At the bottom of the card are two buttons: "Edit" and "Delete". The "Edit" button is highlighted with a red circle.

Informations

Dear Students, Welcome to this edition of SOEN 287 - Web Programming. My name is Abdelghani and I will be facilitating this course this semester. This course aims to provide students with basic knowledge and skills of Web programming, it covers the following topics: Internet architecture and protocols. Web applications through clients and servers. Markup languages. Client-side programming using scripting languages. Static website contents and dynamic page generation through server-side programming. Preserving state (client-side) in web applications. I wish you a wonderful semester.
